

1 Text Formatting

Welcome to the jungle. We’ve got fun and games.
Bold, *italic*, ***bold italic***, `inline code`, and ~~strikethrough~~.

2 Lists

- Bullet item
- Another item
 - Nested bullet
 1. Nested numbered item
 2. Second nested numbered item
- Back to top level
 1. First
 2. Second
 3. Third

Task list:

- ☒ Completed task
- ☐ Open task

3 Blockquote

A quoted line that continues here.

4 Code

Indented code block:

```
echo "indented code block"
```

Fenced code block, no language tag:

```
plain fenced code
second line
```

Fenced code block, with a language tag:

```
def hello():
    print("hi")
```

- This is my question for Cue on page 1
- This is my question for Cue on page 1 on a new line

1. This is my summary for page 1

5 Table

Name	Value
a	1
b	2

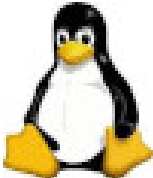

6 Math

Inline math: $E = mc^2$.
Display math:

$$\int_0^1 x^2 dx = \frac{1}{3}$$

7 Links, Images, Autolinks

<https://example.com>

8 Misc

Horizontal rule:

Definition list:

Term Definition of the term.

Superscript/subscript: H₂O and x².

- This is my question for Cue on page 2

1. This is my summary for page 2

2. Verified with scratch tests outside the repo: realistic short summaries stay in column A with no warnings; deliberately long text correctly overflows into column B; and an extreme stress case (6 long items, more than 2 columns can hold) still degrades gracefully — one benign “overfull” warning, no crash, no data loss beyond the documented 2-column limit.

3. Verified with scratch tests outside the repo: realistic short summaries stay in column A with no warnings; deliberately long text correctly overflows into column B; and an extreme stress case (6 long items, more than 2 columns can hold) still degrades gracefully — one benign “overfull” warning, no crash, no data

loss beyond the documented 2-column limit.
